Focal glasses quick guide

Even Realities G2 · LAAIhacks · everything runs on the laptop

THE BASICS

Swipe
Move between items, screens and answer pages. Up or down on the temple touchpad.

Tap
Select or confirm. Opens an item, approves an action, closes an answer card.

Double-tap
Back. With nothing to back out of, it opens the menu (Resume, Voice search, Settings, Exit).

“Hey Focal”
Then your request, in one breath or as two steps. Works on any page; you come back to it after.

Hide the display: say “Hey Focal, hide the display” (or Menu › Hide display). Any tap or swipe, or “Hey Focal, show the display”, brings it back.

On a product page, the “Focal can help” strip pops up after about 10 s: Compare prices, Add to Amazon cart, Review summary. Swipe to one, tap, then tap Approve. Closed it? Say “Hey Focal, show recommendations”.
